

# Future skill requirements Report

Christophe Mbounang Fongang

23.08.2021

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- This Report present the result of the Analysis of future skill requirements for the annual report of global IT and business consulting services
- I'll begin by scraping internet web sites and accessing APIs to collect data in various formats like .csv files, excel sheets, ans databases
- Then apply statistical techniques to analyse the data
- In the end, I'll bring all of Information together by using IBM Cognos Analytics to create a dashboard

# INTRODUCTION

---

- This Analyst is to identify future skill requirements in order to keep pace with changing technologies and remain competitive
- The task consist of collecting data from various sources and identifying trends for this year's report on emerging skills for Global It business consulting
- The gold of this analysis is to answer the questions:
  - What are the top programming languages in demand?
  - What are the top database in demand?
  - What are the popular IDEs?

# METHODOLOGY

---

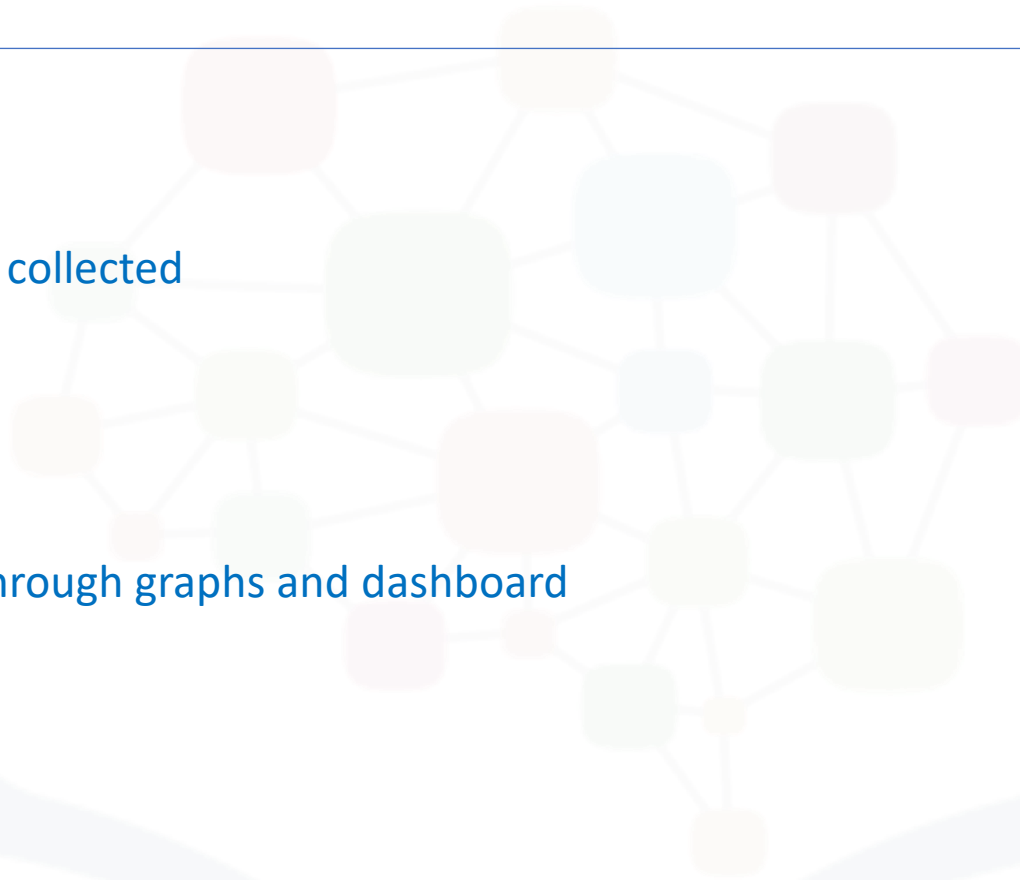

- **Origin of Data** : [https://stackoverflow.blog/2019/04/09/the-2019-stackoverflow-developer-survey-results-are-in/?utm\\_medium=Exinfluencer&utm\\_source=Exinfluencer&utm\\_content=00026UJ&utm\\_term=10006555&utm\\_id=NA-SkillsNetwork-Channel-SkillsNetworkCoursesIBMDA0321ENSkillsNetwork21426264-2021-01-01](https://stackoverflow.blog/2019/04/09/the-2019-stackoverflow-developer-survey-results-are-in/?utm_medium=Exinfluencer&utm_source=Exinfluencer&utm_content=00026UJ&utm_term=10006555&utm_id=NA-SkillsNetwork-Channel-SkillsNetworkCoursesIBMDA0321ENSkillsNetwork21426264-2021-01-01)
- **Data Collection using APIS, Webscraping and explore Data that are the top programming skills that are most in demand from various sources including:**
  - Job postings
  - Training portals
  - Surveys
- **Data Wrangling to Determine Missing Values, Removing Duplicates and Normalizing Data**
- **Using statistical tools to Analyse the Data in order to find:**
  - Distribution
  - Outliers
  - Correlation
- **Visualizing Distribution of Data, Relationship, composition**

# RESULTS

---

- The data was scraped and collected
- The data was wrangled
- The data was organized
- The data was analyzed
- The data was presented through graphs and dashboard

# RESULTS

In the dataset there are many different technologies of **language, database, platform, webplatform**. And the respondent have choice with one the are actually use and with one the would use in the next year.

The respondents are **93,5 percent male versus 6,5 percent female**, most of them in the **United States** and between **16 and 72 years old**

Respondent classified by Gender

Gender  
Woman Man

Respondent Count by Age

# PROGRAMMING LANGUAGE TRENDS

## Current Year

## Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- Javascript, css,sql,shell , python are the most populate language in the current Year
- Javascript, css, python, sql,typescript are the most populate language in the next Year
- Python ist now in 3td position

## Implications

- This language are usefull in many domain(=many jobs opportunity)
- This language will stay in trend
- python is popular and it will become even more so(due to neue technologie like AI)

# DATABASE TRENDS

## Current Year

Top 5 DatabaseWorkedWith

## Next Year

Top 5 DatabaseDesireNextYear

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

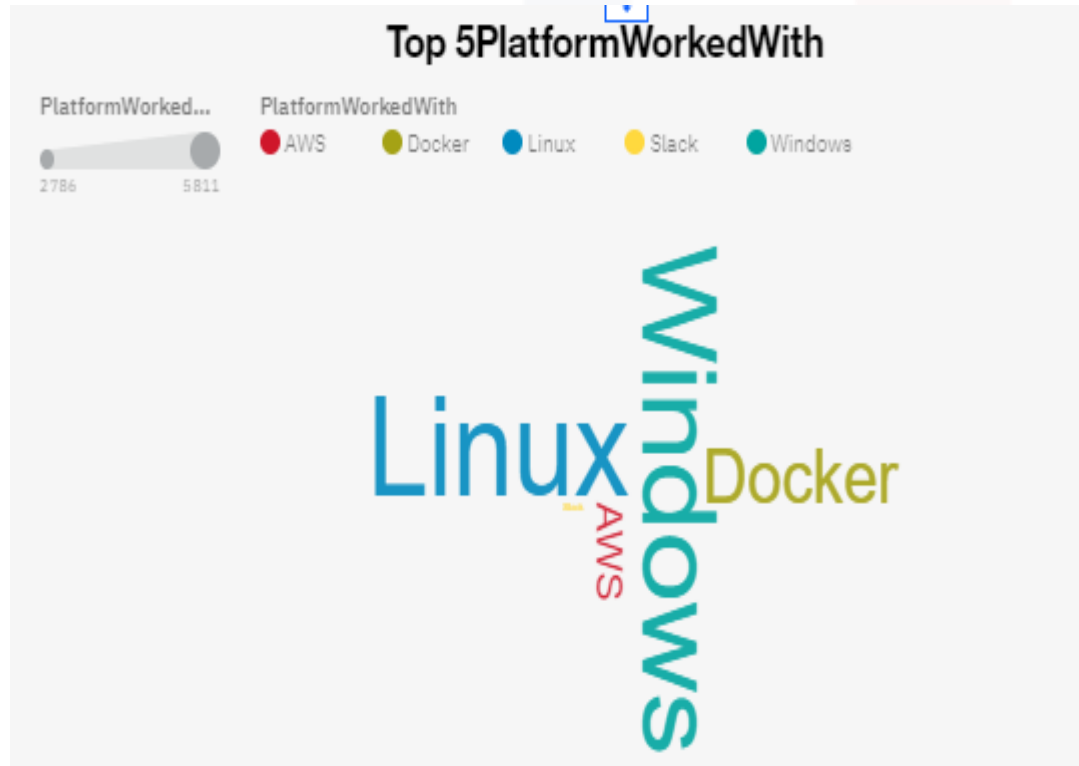

- MySQL, MS SQL Server, PostgreSQL, SQLite, MongoDB are the most popular used Database in the current Year
- PostgreSQL, MongoDB, Redis, MySQL, Elasticsearch are the most selected Database for the next Year
- PostgreSQL and MongoDB will become more popular.
- Elasticsearch and Redis will come in trend

## Implications

- It's a good thing to know how to work with minimal 2 Database
- MySQL, PostgreSQL and MongoDB are important to know
- You should learn how to use Redis and Elasticsearch maybe there the next technology

# PLATFORM TRENDS

Current Year

Next Year

# PLATFORM TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

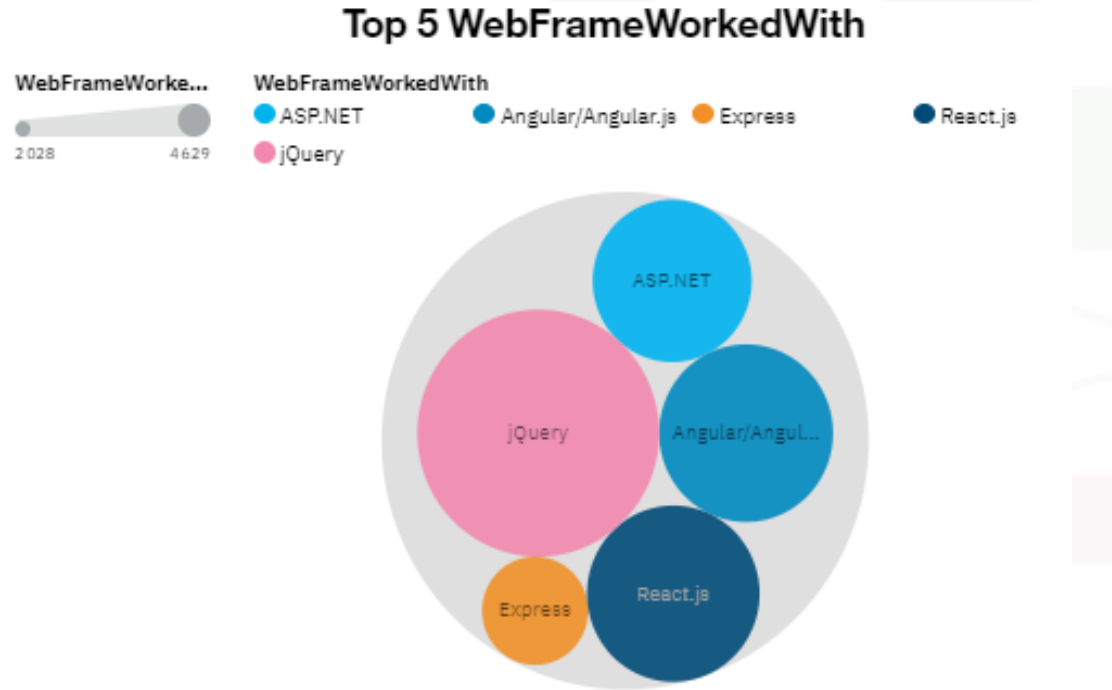

- Linux, Windows, Docker, AWS are the most popular used Platform
- Docker come strong in trend

## Implications

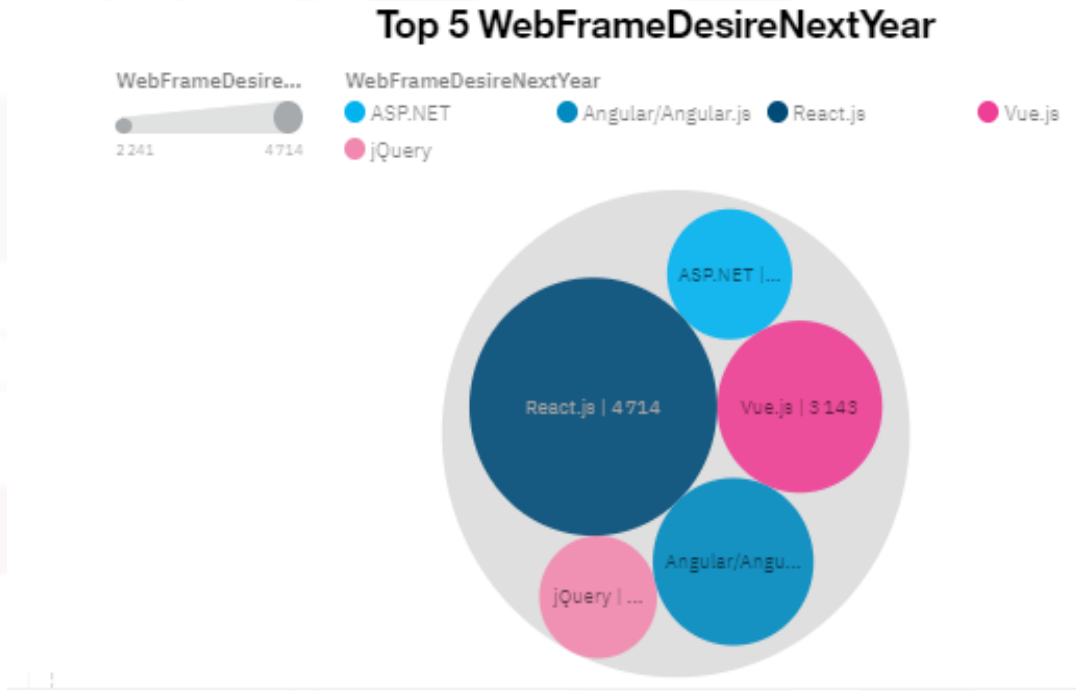

- it's good to know how to work with at least two of this You should
- You should learn how to use Docker

# WEBFRAME TRENDS

## Current Year

## Next Year

# WEBFRAME TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- JQuery, Angular, React.JS, APS.NET, EXPRESS are the most popular used Webframe in the current Year
- React.JS, Vue Js, and Angular come in trend in the next Year

## Implications

- it's good to know how to work with at least two of this You should
- You should learn how to use React.JS and Angular

# DASHBOARD

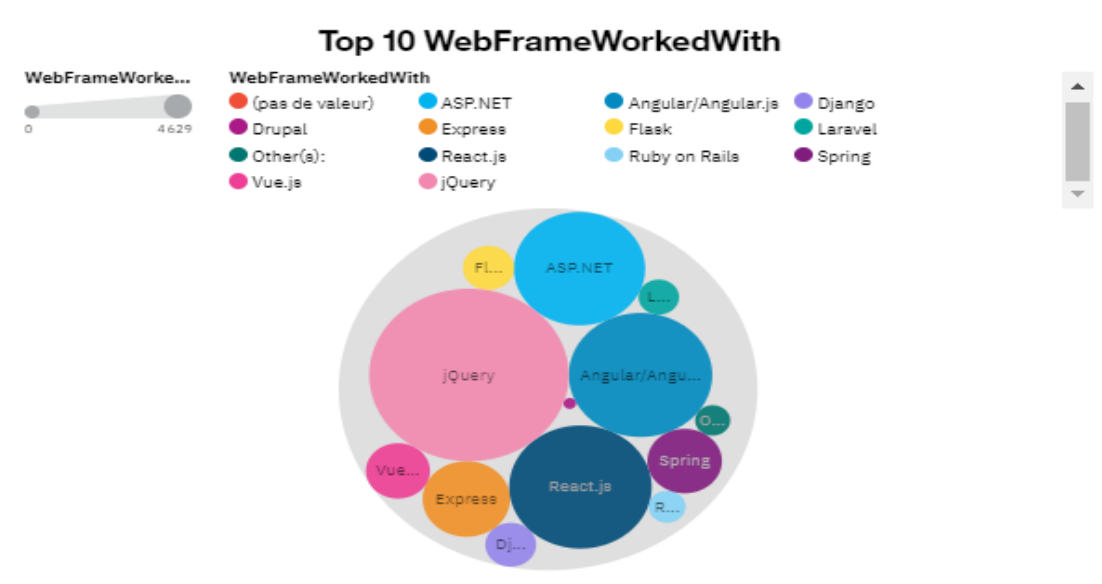

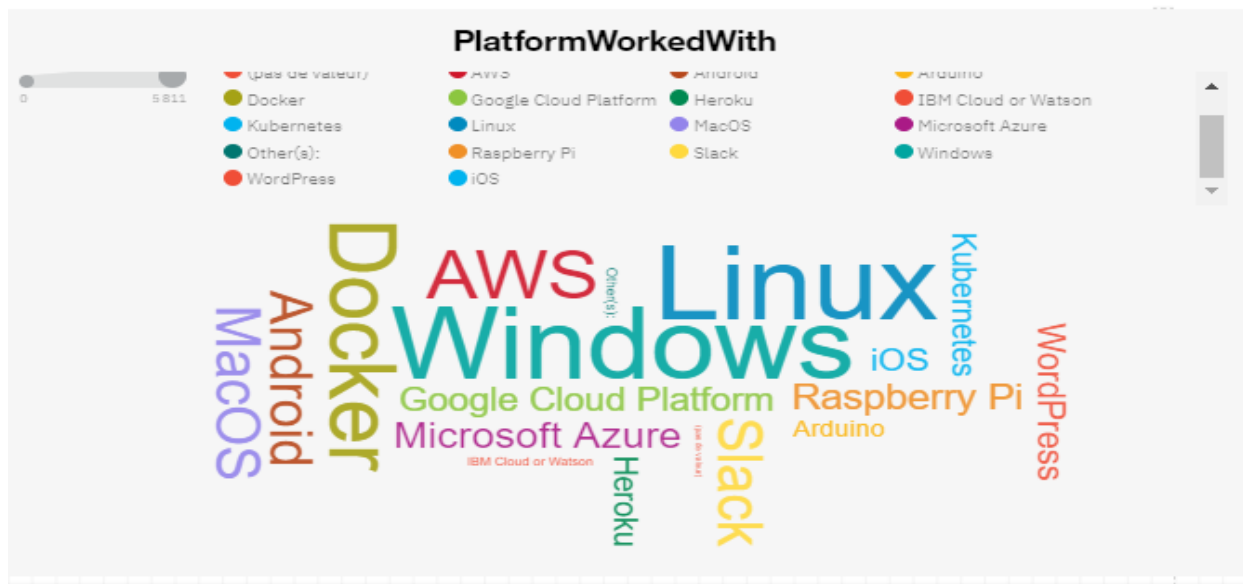

---

The permanent link of the read-only view of the Cognos dashboard : <https://eu-gb.dataplatform.cloud.ibm.com/dashboards/406999f2-2555-426b-8d53-33cf2583a034/view/7321c90331e263ca55c7b1e4079f7e027c3e765be1bbd10b83817b495a317897a86c4797c82c1e098e145661a0eb125fca>

1 2805

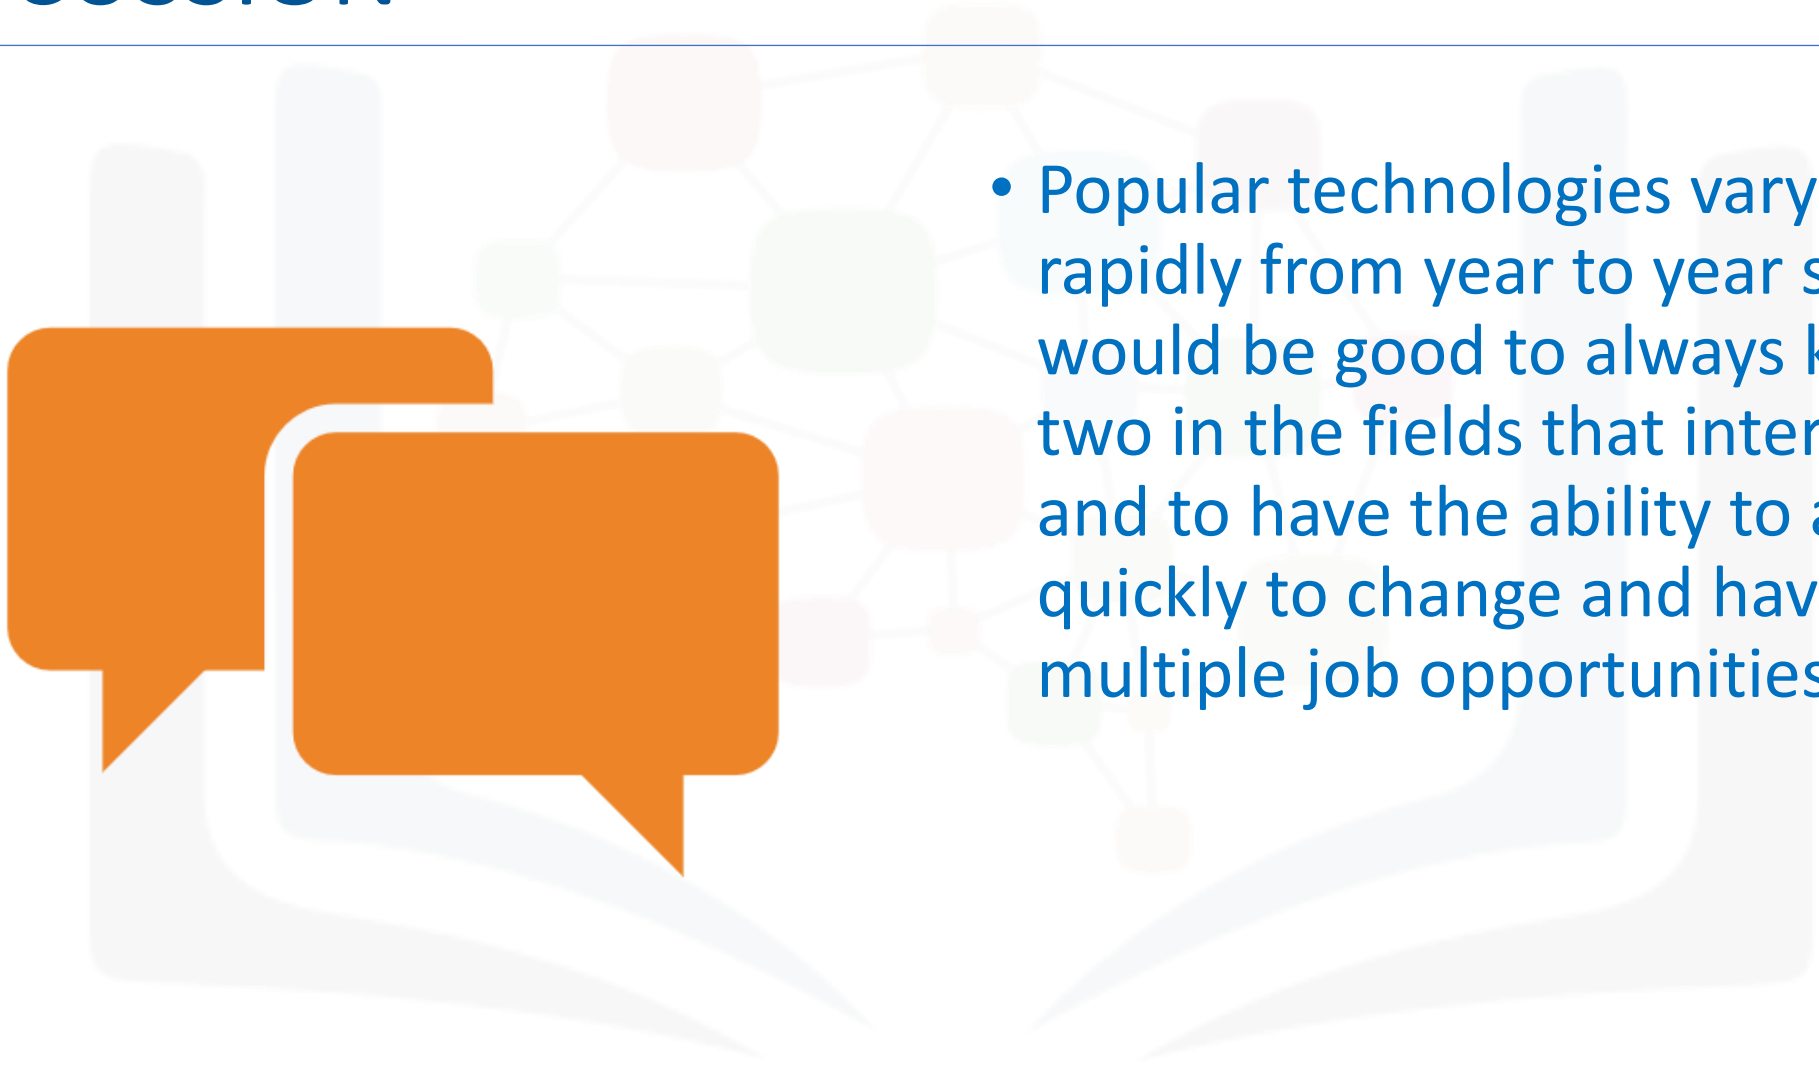

Respondent Count by Gender, classified by Formal Education Level

EdLevel  
● (pas de valeur)  
● I never completed any formal ...  
● Primary/elementary school  
● Some college/university study ...  
● Associate degree  
● Master's degree (MA, MS, M.E...  
● Professional degree (JD, MD, e...  
● Bachelor's degree (BA, BS, B.E...  
● Other doctoral degree (Ph.D, E...  
● Secondary school (e.g. Americ...

# DISCUSSION

---

- 
- Popular technologies vary rapidly from year to year so it would be good to always know two in the fields that interest us and to have the ability to adapt quickly to change and have multiple job opportunities.

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- The top programming languages in demand are: Javascript, css, python, sql, typescript
- The top database in demand are : PostgreSQL, MongoDB, Redis, MySQL, Elasticsearch
- The popular IDEs are: Angular, React.JS, APS.NET, Vue JS, JQuery

## Implications

- there are several job opportunities for those who master these Programming languages
- there are several job opportunities for those who master these technologies
- there are several job opportunities for those who master these technologies

# CONCLUSION

---

- several people are interested in web technologies(javascript, html, React.JS/Angular, Mysql)
- many people are more interested to learn the cloud in the next year(Drocker)
- python is and becoming more and more popular
- to have various job opportunities with a good salary, you must be able to adapt easily to technological change and constantly learn.
- It would therefore be good to know how quickly on average learning a technology (programming language, database platform) takes, to be able to easily plan your learning and always be qualified for new positions.
